

Optimize Faculty Affairs Workflows with SmartPath™ Faculty Position Management Software

Onboarding, appointing, evaluating, and promoting academic faculty doesn't have to be so hard. SmartPath transforms these traditionally labor-intensive, paper-based processes into a completely electronic and efficient operation that faculty affairs and academic HR professionals will love.

Higher education faculty affairs and HR professionals are inundated with a constant flow of paperwork to manage faculty in various stages of employment.

Inefficient, paper-based workflows bottleneck the faculty position management process and cause significant and costly delays, which reflect poorly on the College, the Office of Faculty Affairs, and the departments.

Solving Your Unique Workflow Challenges

We understand that no two schools have the same workflow challenges and requirements. Even within one university, individual schools have different faculty position management policies, procedures, and workflows.

Our team of nationally renowned workflow consultants will help optimize your workflows and configure SmartPath to fit your school's unique requirements, finally delivering the benefits you've been waiting for.

SmartPath™ optimizes faculty position management workflows to increase efficiency and save money at any higher education institution or health system.

▶ Improve Administrative Efficiency

Drastically reduce the time necessary to appoint new hires, improve initial information quality, decrease errors, and eliminate printing and mailing costs.

▶ Easily Manage the Faculty Lifecycle

Access a single view of each faculty member's academic lifecycle from first affiliation to termination or retirement.

▶ Enhance Accuracy

Improve initial data quality with our innovative information gathering and workflow management platform that enhances the accuracy, legality, and compliance of faculty records and other critical candidate information.

▶ Capture Additional Revenue

Avoid potential revenue losses at your medical school by efficiently onboarding, credentialing, and enrolling new clinicians so they can see patients and bill Medicare, Medicaid, and other insurance payors on their first day.

▶ Reduce Administrative Phone Calls

Create one repository for all important documents, status updates, and faculty information throughout every step of the academic lifecycle.

in action at the
**University of Michigan
Medical School**

"SmartPath saves me a significant amount of time and improves the quality and accuracy of materials sent to reviewers."

Department of Pediatrics
